BALKIS®

Part of «en tous cas»
new collection of publishing papers

We made a selection of heavy grammage papers with a natural grain surface : deep or ultra-smooth.

These papers made on felt utilize all the know-how and the commitment of our craftsmen and paper-makers.

They offer the most beautiful surfaces from the precious state of a brilliant white to a delicate creamy ivory.

Balkis® paper is a deep surface. Its natural grain is obtained on felt and offers a unique touch and subtly uneven surface.

HP Indigo certification
on request.

170 - 350 gsm

Applications

Publishing, cover and sleeves, greeting and invitation cards.

Utilisation

Inkjet printer: printing quality guaranteed up to 160 gsm.

Laser printer: printing quality guaranteed from 80 to 160 gsm.

Other elements : offset, letterpress, silk screen, thermography, foil blocking, die stamping, embossing, varnishing...

Printing recommandation

Screen ruling : 133 lpi.

It is recommended to use fully oxidizing inks. It should be used an anti-set-off powder.

In case of following laser printing the use of specific ink is advisable.

Varnishing

The offset varnishes adapt perfectly as well as protection as mat varnish.

The silk screen varnishes can give gloss results after being passed once ore more if necessary.

Folding

Folds should follow the machine or grain direction. Pre-creasing or scoring is required for 170 gsm and up.

Packaging and storage

Store the wrapped paper in the printing machine room until it has adapted to the room temperature.

Only remove the wrapping paper shortly before printing.

Cover paper after the printing process has been finished.
