Distinction®

Part of «en tous cas»
new collection of publishing papers

We made a selection of heavy grammage papers with a natural grain surface : deep or ultra-smooth.

These papers made on felt utilize all the know-how and the commitment of our craftsmen and paper-makers.

They offer the most beautiful surfaces from the precious state of a brilliant white to a delicate creamy ivory.

Distinction® is an exclusive and noble paper. It stands out by an extremely smooth surface, a sublime whiteness which comes in a superbe range of three surfaces : smooth, laid and matt.

HP Indigo certification
on request.

120 - 320 gsm

information for guidance only // preliminary tests are recommended

Applications

Publishing, brochures, letterhead, covers and sleeves, greeting and invitation cards.

Utilisation

Offset, letterpress, silk screen, thermography, foil blocking, die stamping, embossing, varnishing...

Printing recommandation

Screen ruling : 150 lpi

It is recommended to use conventional, positive-drying inks or fully oxidizing inks. The utilisation of UV inks is possible, but overnight / stay fresh / duct-stable inks should be avoided. It should be used an anti-set-off powder. Allow sufficient drying time. Infra red drying assistance is possible. In case of following laser printing the use of specific ink is advisable.

Varnishing

The use of a compatible pre-sealer is strongly recommended before applying a gloss UV varnish. Paper weights under 160 gsm should not be varnished.

Folding

Pre-creasing or scoring is required for 160 gsm and up.

Packaging and storage

Store the wrapped paper in the printing machine room until it has adapted to the room temperature. Only remove the wrapping paper shortly before printing. Cover paper after the printing process has been finished.
