# Iridium®

Part of «en toutes lettres»  
new collection of publishing papers

We made a selection of our finest papers in low grammage, without watermarks. They will lend quality and elegance to your finest printing jobs.

Iridium® is a paper of strong modernity with a beautiful body ; white, ecru and ivory gourmand are also available in higher grammages for other applications than letterheads.

HP Indigo certification  
on request.

115 - 160 gsm

#### Applications

Publishing, corporate communication, letterhead, covers and sleeves, greeting and invitation cards.

#### Utilisation

Inkjet and laser printer: printing quality guaranteed up to 120 gsm.  
Other elements : offset, letterpress, silk screen, thermography, foil blocking, die stamping, embossing, varnishing...

#### Printing recommendation

Screen ruling : 133 lpi

It is recommended to use conventional, positive-drying inks or fully oxidizing inks. The utilisation of UV inks is possible, but overnight / stay fresh / duct-stable inks should be avoided. It should be used an anti-set-off powder. Allow sufficient drying time. Infra red drying assistance is possible. In case of following laser printing the use of specific ink is advisable.

#### Varnishing

The offset varnishes adapt perfectly as well as protection or mat varnish. The use of a compatible pre-sealer is strongly recommended before applying a gloss UV varnish. Paper weights under 160 gsm should not be varnished. The silk screen varnishes can give gloss results after being passed once or more if necessary.

#### Folding

Folds should follow the machine or grain direction.

Pre-creasing or scoring is required for 160 gsm and up.

#### Packaging and storage

Store the wrapped paper in the printing machine room until it has adapted to the room temperature.

Only remove the wrapping paper shortly before printing.

Cover paper after the printing process has been finished.
